provider

# Business Portfolio

# Our Story

Welcome to ChartersField Consultants, your trusted partner for comprehensive Microsoft Dynamics 365 implementation services, support services, upgrade services, and custom application development. With a dedicated team boasting 10 years of experience in ERP implementation, we have established ourselves as trusted experts in the field.

With a strong focus on business-to-business work models, we assist IT companies in the US, Europe, and Australia by providing end-to-end ERP implementation assignments or providing offshore resources to complement your existing team.

Our team is more than just an Enterprise Business Solutions provider. We are a team of experienced and agile consultants who specialize in MS Dynamics 365 Business Central, F&O, Open source, and Mobile technologies. With a customer-centric execution model, we take complete ownership of your project from conception to completion, ensuring a seamless and successful outcome.

Choose ChartersField Consultants as your trusted partner for Microsoft Dynamics 365 implementation and beyond. Experience the difference of working with a team that is dedicated to your success and understands the intricacies of your industry.

# Our Comprehensive Service Portfolio

## End-to-End ERP and CRM Implementation

We provide complete end-to-end implementation services for Microsoft Dynamics 365 ERP and CRM systems. This includes requirements gathering, system design, configuration, customization, data migration, testing, training, and deployment

## System Upgrades and Enhancements

As new versions and updates are released for Microsoft Dynamics 365, we offer services to help your clients upgrade their existing systems to the latest version.

## Custom Application Development

Our experienced developers create custom applications and extensions that integrate seamlessly with Microsoft Dynamics 365, addressing specific business requirements.

## User Training and Support

. We provide comprehensive user training programs to educate clients' employees on how to effectively utilize the features and functionalities of Microsoft Dynamics 365. Additionally, you can offer post-implementation support services to address any system issues, provide troubleshooting assistance, and answer user queries.

## Dedicated Offshore Resources

We offer dedicated offshore functional consultants with expertise in Microsoft Dynamics 365, providing remote assistance and guidance for optimizing ERP implementation, as well as skilled technical consultants, experienced in developing customizations, integrations, and performance optimization..

## Business Intelligence and Reporting

We provide services to help clients leverage BI features to gain valuable insights from their data. This may involve creating custom dashboards, reports, and analytics to enable informed decision-making and drive business growth.

# Unlocking the Benefits: Offshore Resources from India

 **At ChartersField, We understand the unique needs of Global IT companies and the value that dedicated offshore resources can bring to their projects. When you choose to hire offshore resources from us, you unlock a range of benefits tailored to support your Microsoft Dynamics 365 implementation and other IT requirements.**

 **Cost-Effectiveness**  
Offshore resources from India offer significant cost savings compared to hiring local resources in your location.

 **Backend Support for Implementation Services:**  
Our dedicated offshore resources act as an extension of your team, providing valuable backend support.

 **Access to a Pool of Talent**  
By hiring offshore resources, you gain access to a vast talent pool in India. We carefully select and onboard highly skilled functional and technical consultants.

 **Flexible Engagement Models**  
We offer flexible engagement models tailored to suit your specific needs. Choose from hourly models, allowing you to leverage our resources based on your project requirements. Alternatively, opt for full-time engagement models for long-term or ongoing projects, resources exclusively for your organization.

 **Expertise of Offshore Resources**  
Our offshore resources bring extensive expertise in Microsoft Dynamics 365, including Business Central and Finance & Operations.

 **Scalability and Agility**  
With offshore resources, you can easily scale your team up or down based on project demands.

 **Cultural Adaptability**  
India has a long history of successfully delivering offshore IT services to global clients. Our offshore resources are accustomed to working with international clients,

 **Time Zone Advantage**  
One of the key advantages of offshore resources is the time zone difference. Our offshore team in India can provide support and progress on your projects even when your on-site team is offline

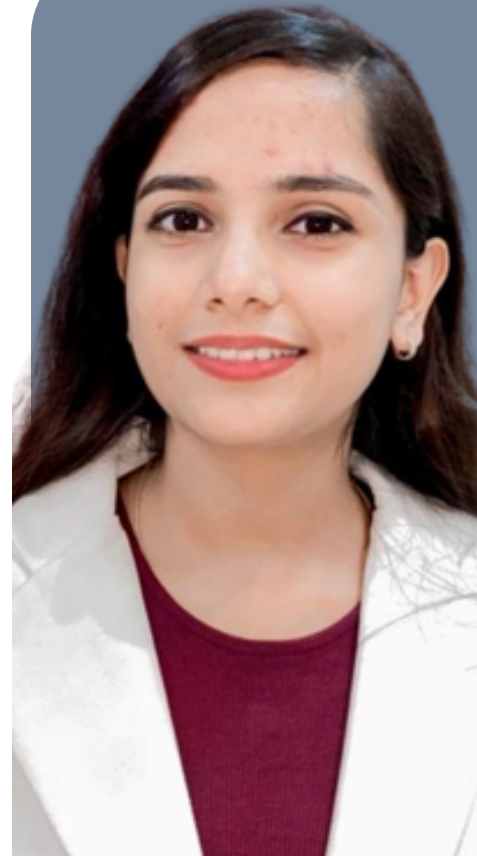

# Meet the Team

## Jigar Samani

### PRESIDENT
